Sikkerhedsinstruktioner og advarsler

Læs brugsanvisningen, før du bruger apparatet.

Overhold sikkerhedsinstruktionerne i denne manual.

EMOS spol. s r.o. erklærer, at produkterne H5111 er i overensstemmelse med de væsentlige krav og andre relevante bestemmelser i direktiverne. Udstyret kan frit anvendes i EU.

Overensstemmelseserklæringen kan findes på hjemmesiden http://www.emos.eu/download.

Udstyret kan anvendes på grundlag af den generelle tilladelse nr. VO-R/10/07.2021-8 med ændringer.

Pakkens indhold Koblingsmodul Manual Magnetisk sensor

Tekniske specifikationer Strøm: AC 100-240 V 50/60 Hz Dimension: 40 × 40 × 18 mm Nettovægt: 30 g App:EMOS GoSmart til Android og iOS Kommunikationsprotokol:Wi-Fi IEEE 802.11b/g/n 2,412GHz-2,484GHz

Beskrivelse af enheden

- 1 RESET-knap
- 2 Huller til montering
- 3 Ledningsdiagram for det relevante modul
- 4 LED-statuslys
 - Blinker blåt Enheden er i parringstilstand / har afbrudt forbindelsen til netværket
 - Lyser blåt enheden er i driftstilstand
- 5 Klemrække til tilslutning af kabler
- 6 Magnetisk sensor

Opsigelse

Det anbefales på det kraftigste, at Smart Garage-modulet installeres af en person med kendskab til elektriske ledninger. Dårligt udført installation kan udgøre en risiko for elektrisk stød. Følg nøje de følgende instruktioner, og overhold de maksimale udstyrsbelastninger, der er anført nedenfor, for at sikre sikker og korrekt drift.

Modulet understøtter kun 2,4 GHz Wi-Fi (understøtter ikke 5 GHz).

Installation og montering

Placer det tilsluttede modul i installationsboksen under kontakten. Takket være muligheden for fastgørelse kan modulet også installeres forskellige andre steder (f.eks. under gipsplader, i loftet ...) Ledningsdiagrammet findes nedenfor.

Af funktionelle og sikkerhedsmæssige årsager er det vigtigt, at alle kabler, der er forbundet med dette modul, afisoleres i enden med en længde på 7 mm.

Forbindelsen afhænger af mulighederne i garagen og garageåbneren. Det første skridt er at kontrollere, om garagemodulet er kompatibelt med portåbneren. Hvis du allerede har en fysisk døråbner installeret, vil modulet være kompatibelt. Hvis du ikke har en knap, skal du finde indgangsportene til knappen i manualen til døråbneren og tilslutte modulet til dem.

Verifikation af kompatibilitet

Kontrollér, at din garageåbner er opført i tabellen "Kompatible modeller" i slutningen af dette dokument. Hvis ikke, skal du følge nedenstående procedure:

1. Garageportåbnere med en gul eller lilla "Learn"-knap vil sandsynligvis ikke fungere. Åbnere med denne funktion er normalt begrænset til at åbne med fjernbetjeninger, ikke med en ekstern knap.

2. I instruktionerne/diagrammet for garageåbneren skal du finde de terminaler, hvor den klassiske kontakt skal tilsluttes, og prøve at kortslutte signalet mellem disse to terminaler. Hvis dette får garageporten til at åbne, er modulet kompatibelt med denne åbner.

Installation af modulet

- 1. Sluk for strømmen til modulet og garageåbneren.
- 2. Tilslut LN-ledningerne til de tilsvarende ben (L,N).
- 3. Forbind ledningerne mellem garageåbneren og modulterminalen.

Installation af magnetisk sensor

Det magnetiske sensorkabel er 5 meter langt, så sensoren skal installeres inden for dette område. Sensoren fungerer efter et enkelt princip: Den registrerer, om de to halvdele af magneten er i kontakt med hinanden. Det gør det muligt for modulet at registrere, om garageporten er åben eller lukket. Placeringen af sensoren afhænger derfor af det specifikke layout o g d e n plads, der er til rådighed i garagen. Magneten kan monteres på forskellige overflader som f.eks. vægge, dørbeslag eller strukturelle elementer.

Sæt sensorkablet i de relevante klemmer på modulet (S3,S4).

Parring med en applikation

Installation af EMOS GoSmart-appen

- Appen er tilgængelig til Android og iOS via Google play og App Store.
- Scan venligst QR-koden for at downloade appen.

Åbn EMOS GoSmart-appen, og bekræft privatlivspolitikken, og klik på Jeg accepterer. Vælg registreringsmuligheden.

Indtast navnet på en gyldig e-mailadresse, og vælg en adgangskode. Bekræft dit samtykke til privatlivspolitikken. Vælg registrer.

Parring med en app

Vælg Tilføj enhed.

Vælg GoSmart-produktkategorien, og vælg Smart Garage Module.

Nulstil modulet ved at holde RESET-knappen nede i 5 sekunder, og kontroller, at LED'en blinker. En automatisk enhedssøgning vil finde sted.

Efter vellykket parring viser appen en bekræftelsesskærm. Brug blyantikonet til at navngive modulet efter dine behov.

Betjening og funktioner

Ikoner og indikatorlamper

1 - Indstillinger for udvidelse

(Beskrives mere detaljeret i det

følgende kapitel) 2 - Visning af den aktuelle status

(Åben/lukket)

- 3 Kontrolknap
- 4 Rekord
- 5 Planlægning
- 6 Timer
- 7 Indstillinger

(Indstilling af adgangskode til Google-assistent og dørens rejsetid)

Beskrivelse af udvidelsesindstillinger

- Tredjepartsstyring indstillinger for Alexa og Google Assistant
- Enhedsoplysninger Grundlæggende oplysninger om enheden og dens ejer
 - Tap-to-Run og automatisering Se scener og automatiseringer, der er tildelt enheden. Det er muligt at oprette scener direkte i applikationens hovedmenu i afsnittet "Scener"
 - Opret gruppe Opret enhedsgrupper
 - Del enhed Del enhedshåndtering med en anden bruger
 - Offline-meddelelse For at undgå konstante påmindelser sendes der en meddelelse, hvis enheden forbliver offline i mere end 30 minutter.
 - FAQ & Feedback Se de mest almindelige spørgsmål sammen med deres løsninger plus muligheden for at sende et spørgsmål/forslag/feedback direkte til os.
 - Tilføj til startskærm Tilføj et ikon til din telefons startskærm. Med dette trin behøver du ikke at åbne din enhed via appen hver gang, men skal bare klikke direkte på det tilføjede ikon, så kommer du direkte til modulet.

Ofte stillede spørgsmål om fejlfinding

Jeg kan ikke få enhederne til at parre. Hvad kan jeg gøre ved det?

- Sørg for, at du bruger et 2,4 GHz wifi-netværk og har et stærkt nok signal.
- Giv appen alle tilladelser i indstillingerne
- Sørg for, at du bruger den nyeste version af mobiloperativsystemet og den nyeste version af appen.

Hvad skal jeg gøre, hvis jeg ændrer mit Wi-Fi-netværk eller min adgangskode?

• Modulet skal nulstilles og parres med applikationen igen.

Hvad sker der, hvis Wi-Fi-netværket holder op med at virke?

Hvis du også har en fysisk kontakt tilsluttet modulet, kan enheden stadig styres uden problemer. Du vil dog
ikke kunne styre modulerne via appen, før Wi-Fi-netværket er oppe at køre. Undtagelsen er ZigBeemoduler, som stadig kan fjernstyres med andre ZigBee-enheder, f.eks. EMOS H5011 Scenic Switch, selv efter
en internetafbrydelse.
